The graph displays the daily number of COVID-19 cases in the United Kingdom. The x-axis represents time, with labels for October, January, and April. The y-axis represents the number of cases, with a scale from 0 to 100,000. A red dashed vertical line is positioned at the beginning of the timeline. The data points are connected by a black line, showing a period of low activity followed by a major surge in early 2021, peaking at approximately 105,000 cases, and then a subsequent decline and fluctuation.
