The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 0, 20,000, 40,000, 60,000, 80,000, and 100,000. The x-axis is labeled with months: Oct, Jan, and Apr. A vertical red dashed line is positioned at the end of December. The data points are connected by a black line. There is a notable spike in cases in early January, reaching approximately 95,000 cases, followed by a sharp decline and then a gradual increase through April.

The graph displays the daily count of COVID-19 cases in the United States. The data begins in early November, indicated by a red dashed line. The case count fluctuates between approximately 2 and 14 cases from November through December. A major peak occurs in early January, with the case count exceeding 20. Following this peak, the case count drops sharply and remains relatively low, mostly below 5 cases, through April.
