The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled from 0 to 20 in increments of 5. The x-axis shows months from September to April. A red dashed vertical line is positioned at the end of December. The data shows a first wave peaking at approximately 14 cases in late November, followed by a decline. A second, much larger wave begins in late December, peaking at over 20 cases in early March, before declining again.
