Figure 1 is a scatter plot showing the time series of the difference between the estimated and true values of the parameter α . The x-axis represents time, with labels for April (Apr), July (Jul), October (Oct), and January (Jan). The y-axis represents the difference, ranging from -0.050 to 0.050. The plot shows several data points clustered around zero, with vertical dashed red lines indicating specific time points.

The scatter plot displays daily death tolls in the US. The data points are as follows:

Date (Approximate)	Deaths per Day
May 1	30.8
July 1	31.4
August 1	32.5
September 1	32.5
October 1	32.5
October 15	32.5
October 20	32.5
October 25	32.5
November 1	32.5
November 15	32.5
December 1	32.5
December 15	28.7
