The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for October, January, and April. The y-axis represents the number of cases, with a scale from 0 to 1,000,000. A vertical dashed red line is positioned at the end of October. The data shows a period of low case counts (mostly below 100,000) from October through late December. Starting in early January, there is a significant surge in cases, reaching a peak of approximately 1,000,000 in early January. Following this peak, the case counts fluctuate, with another notable peak around mid-February, before showing a general decline towards April, where cases are again mostly below 100,000.

The graph displays the daily number of COVID-19 cases in the United States from October to April. The y-axis represents the number of cases, ranging from 0 to 100,000. The x-axis shows the months from October to April. A vertical dashed red line is positioned at the start of the period shown. The data shows a general upward trend with significant fluctuations, including a sharp drop in late March/early April.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is logarithmic, with major ticks at 100,000 and 1,000,000. The x-axis spans from October to April. A red dashed vertical line is positioned at the beginning of the data series in early November. The data shows a period of fluctuation between approximately 100,000 and 500,000 cases from November to early January. A massive spike occurs in early January, peaking at over 1,000,000 cases. Following this peak, the case count drops sharply and remains relatively low, fluctuating between 100,000 and 200,000 cases through April.

The graph displays the daily count of COVID-19 cases in the United States. The data shows a period of increasing cases from October through mid-November, followed by a sharp decline and a period of low case counts through April. A red dashed vertical line is drawn at approximately November 15th, likely indicating a specific point of interest or intervention.
