The graph displays the daily count of COVID-19 cases in the United States. The data shows a period of low activity from October 2019 through late March 2020, followed by a rapid and significant increase in cases, peaking in early April 2020. A red dashed line indicates the onset of the pandemic.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 0, 10, 15, and 20. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at approximately November 20th, labeled 'lockdown' in the text below. The data shows a period of increasing cases from October through late November, peaking at nearly 20 cases. Following the lockdown, there is a sharp drop in cases, which then remains relatively low and stable through April, with a notable spike back up to 20 cases in late March/early April.
