The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000 in increments of 2,000. The x-axis shows months from November to April. A red dashed vertical line is positioned at the beginning of December, indicating the start of the second wave. The data shows a first wave peaking in late October at approximately 8,000 cases, followed by a decline. A second, much larger wave begins in early December, peaking in late February/early March at nearly 10,000 cases, before declining again towards April.

The graph displays the daily number of COVID-19 cases in the Netherlands from November to April. The y-axis represents the number of cases, ranging from 0 to 20. The x-axis shows the months: Nov, Dec, Jan, Feb, Mar, and Apr. A vertical dashed red line is positioned at the beginning of December, indicating the start of the second wave. The data shows a period of relative stability in November, followed by a sharp increase in early December. After a decline in January, there is a significant peak in early March, reaching over 20 cases, followed by a period of fluctuation in April.

| Month | Day | Cases |
|-------|-----|-------|
| Nov   | 1   | 8     |
