The graph displays the daily number of COVID-19 cases in the Netherlands from November to April. The y-axis represents the number of cases, ranging from 0 to 15. The x-axis represents the months. A vertical dashed red line is drawn at the beginning of December, indicating the start of the second wave. The first wave peaks in late November at approximately 12 cases. The second wave peaks in early March at approximately 15 cases. The data shows a clear pattern of waves, with the second wave being more severe than the first.

The graph displays the daily count of new COVID-19 cases in the United States. The y-axis is labeled with values 7.5, 10.0, 12.5, and 15.0. The x-axis is labeled with months: Nov, Dec, Jan, Feb, Mar, and Apr. A vertical dashed red line is positioned at approximately January 20, 2020. The data shows a peak in late December, followed by a sharp drop and a period of low case counts with some minor fluctuations through April.

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000. The x-axis shows months from November to April. A vertical red dashed line is positioned at the end of December, indicating the start of the second wave. The data shows a sharp increase in cases in early March, peaking at approximately 9,500 cases, followed by a rapid decline and a subsequent rise in April.

The graph displays the daily number of COVID-19 cases in the Netherlands from November to April. The y-axis represents the number of cases, ranging from 0 to 20. The x-axis shows the months: Nov, Dec, Jan, Feb, Mar, and Apr. A vertical dashed red line is positioned at the beginning of December, indicating the start of the second wave. The data shows a period of relative stability in November, followed by a sharp increase in early December. After a decline in January, there is a significant peak in early March, reaching over 20 cases, followed by a period of fluctuation in April.
