The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for October, January, and April. The y-axis represents the number of cases, with a scale from 0 to 1,000,000. A vertical red dashed line is positioned at the end of September 2020. The data shows a period of low case counts from late September through November, followed by a gradual increase starting in December. A major peak occurs in late March/early April 2021, reaching nearly 1,000,000 cases, before declining.
