The graph displays the daily number of COVID-19 cases in the United States from November to April. The x-axis represents time, with labels for November, December, January, February, March, and April. The y-axis represents the number of cases, with a scale from 0 to 100,000. A vertical dashed red line is positioned at the start of the period from December 2019 to January 2020. The data shows a significant increase in cases starting in late December, peaking in early March at approximately 100,000 cases, and then declining to around 20,000 cases by April.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled 'Number of cases' and ranges from 0 to 100,000 in increments of 20,000. The x-axis shows the months from November to April. The data points are connected by a line, showing a general upward trend with significant fluctuations. A vertical dashed red line is drawn at the end of December, indicating the start of the period where the number of cases is reported to be increasing significantly.

The graph displays the daily number of COVID-19 cases in the Netherlands. The x-axis represents time from November to April, and the y-axis represents the number of cases. A vertical dashed red line is positioned at the start of the period from December 1st to March 1st. The data shows a period of relative stability in November, followed by a sharp increase in late December. The number of cases continues to rise through January, reaching a peak in late February/early March, and then declines sharply in April.

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000. The x-axis shows months from Nov to Apr. A red dashed vertical line is positioned at the beginning of December, indicating the start of the second wave. The data shows a first wave peaking in late October at approximately 8,000 cases, followed by a decline and then a second, much larger wave peaking in late February/early March at over 10,000 cases.

The graph displays the daily number of COVID-19 cases in the Netherlands from November to April. The y-axis represents the number of cases, ranging from 0 to 20. The x-axis shows the months: Nov, Dec, Jan, Feb, Mar, and Apr. A red dashed vertical line is positioned at the beginning of December, indicating the start of the second wave. The data shows a period of relative stability in November, followed by a sharp increase in early December. After a decline in January, there is a significant peak in early March, reaching over 20 cases, followed by a period of fluctuation in April.
