The graph displays the daily number of COVID-19 cases in the United States. The y-axis is on a logarithmic scale, with major ticks at 100,000 and 1,000,000. The x-axis spans from October to April. A red dashed vertical line is positioned at the beginning of the data series in early November. The data shows a period of low case counts (mostly below 100,000) from November to December, followed by a massive spike in early January that exceeds 1,000,000 cases. After this peak, the case counts decline and remain relatively low through April.

The graph displays the daily number of COVID-19 cases in the United States from September to April. The y-axis represents the number of cases, with major grid lines at 0, 5, 10, 15, and 20. The x-axis shows the months from October to April. A vertical dashed red line is positioned at the end of October, indicating the start of the second wave. The data shows a significant peak in early November, followed by a decline and then a sharp spike in early December.

Month	Approximate Daily Cases
Sept	~2.5
Oct	~2.5
Nov	~12.5
Dec	~20.5
Jan	~2.5
Feb	~2.5
Mar	~2.5
Apr	~2.5
