The graph displays the percentage of relative coefficient of variation (%rCV) over time. The x-axis represents months from October to April. The y-axis represents %rCV, ranging from 5 to 20. The data shows a highly variable time series with a general upward trend. Two vertical dashed red lines are present at approximately November 15 and November 25. The data points are connected by a dark red line, and each point is marked with a dark red circle.
