The graph displays the percentage of reads with coverage variation (%rCV) over time. The x-axis spans from October 2024 to October 2025. The y-axis represents %rCV from 0 to 15. A green line with circular markers shows the data, which is mostly below 5% until a sharp spike to 15% in late 2025. Red squares mark specific data points. Two vertical red dashed lines are at Jan 2025 and Feb 2025.

The graph displays the percentage of relative coefficient of variation (%rCV) over a period from October 2024 to October 2025. The y-axis is labeled '%rCV' and ranges from 0 to 9. The x-axis shows months from Oct 2024 to Oct 2025. A green line with black dots represents the data, showing significant fluctuations. Red squares highlight specific data points, likely indicating high values or specific events. Two vertical dashed red lines are positioned at approximately January 2025 and February 2025.

The graph displays the percentage of relative coefficient of variation (%rCV) over time. The x-axis represents time from October 2024 to October 2025, with major ticks every three months. The y-axis represents %rCV, ranging from 0 to 10.0 in increments of 2.5. A green line with circular markers shows the daily %rCV, which fluctuates between approximately 1.5 and 6.0. Red squares are placed on the green line at specific dates, indicating points of interest or specific measurements. A vertical dashed red line is drawn at the beginning of January 2025.
