B530-A-% rCV

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000 in increments of 2,000. The x-axis is labeled 'Date' and shows months from September to April. A red dashed vertical line is positioned at the beginning of March, indicating the start of the lockdown. The data shows a very high initial peak in late September, followed by a period of lower case counts with some fluctuations. A second, smaller peak is visible in late March, after which the case counts generally decrease, with a slight uptick in early April.
