V3-% rCV

V4-% rCV

The graph displays the percentage of reads with a variant (%rCV) over time. The x-axis represents time from October 2024 to July 2025. The y-axis represents %rCV, ranging from 2 to 7. The data is shown as a pink line with open circles for daily measurements and red squares for weekly measurements. Two vertical dashed red lines are present at approximately October 10, 2024, and January 10, 2025. The data shows a significant peak in late 2024, reaching nearly 7% rCV, followed by a sharp decline and then a period of relative stability around 2-3%.

Figure 1 is a line graph showing the percentage of reads with a coverage value (rCV) over time. The y-axis is labeled '%rCV' and ranges from 2 to 7. The x-axis shows dates: Oct 2024, Jan 2025, Apr 2025, and Jul 2025. The data is represented by a magenta line with open circles. Two vertical dashed red lines are present: one at approximately Oct 2024 and another at approximately Jan 2025. The graph shows a significant peak in rCV around late 2024/early 2025, reaching nearly 7%.
