B530-A-% rCV

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000 in increments of 2,000. The x-axis is labeled 'Date' and shows months from September to April. A red dashed vertical line is positioned at the beginning of March, indicating the start of the lockdown. The data shows a significant peak in late September, reaching nearly 10,000 cases. Following this, the number of cases fluctuates between approximately 1,000 and 3,000. A second, smaller peak is observed in late March, reaching about 4,000 cases, before declining and then showing a slight uptick in early April.
