The graph displays the daily number of COVID-19 cases in the Netherlands from October to April. The y-axis represents the number of cases, ranging from 0 to 15. The x-axis represents time, with labels for October, January, and April. A red dashed vertical line is positioned at the end of November, indicating the start of the second wave. The first wave peaks in late November at approximately 12 cases. The second wave is significantly larger, peaking in late March at 15 cases. The data shows a clear pattern of waves, with the second wave being much more intense than the first.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 7.5, 10.0, 12.5, and 15.0. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at approximately January 20, 2020. The data shows a rapid rise in cases starting in late December, reaching a peak of about 15.0 cases in early January, followed by a sharp decline and a period of low case counts from February onwards.
