The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled 'Number of cases' and ranges from 0 to 100,000 in increments of 20,000. The x-axis shows months from October to April. The data points are connected by a line, showing a general upward trend with significant fluctuations. A vertical dashed red line is drawn at the end of December. A sharp drop in cases is visible in early March, followed by a rapid recovery.

The graph displays the daily number of COVID-19 cases in the Netherlands. The data shows a first wave peaking in early January at approximately 90,000 cases. Following a period of decline, a second wave begins in early December, reaching a peak of about 80,000 cases in late February. A sharp decline in cases is observed in late February and early March, coinciding with the implementation of strict lockdown measures. The data ends in early April, showing a slight uptick in cases.
