The graph displays the percentage of relative coefficient of variation (%rCV) over a period from July 2024 to July 2025. The y-axis represents %rCV, ranging from 1 to 6. The x-axis represents time in months. Two vertical dashed red lines are positioned at approximately September 2024 and January 2025. The data shows significant fluctuations, with major peaks occurring before the first dashed line (reaching nearly 6% in late August) and before the second dashed line (reaching about 5.2% in late December). Following the second dashed line, the values generally decrease and stabilize between 1.5% and 2.5%.
