The figure is a line plot showing the daily number of COVID-19 cases in the Netherlands from October 2023 to September 2024. The x-axis represents time, with labels for Oct 2024, Jan 2025, Apr 2025, and Jul 2025. The y-axis represents the number of cases, with a grid extending up to 1000. The data is plotted as a magenta line with open circles at each data point. There are two vertical dashed red lines: one at 2023-10-01 and another at 2024-01-01. Two red squares highlight specific data points: one on the initial peak in late 2023 and another on the peak in early 2024. The plot shows a significant peak in late 2023, followed by a decline and then a resurgence in early 2024.
