The graph displays the daily number of COVID-19 cases in the Netherlands from December 1st to April 1st. The x-axis represents time, with labels for Dec, Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a grid extending up to 1000. The data shows a period of low activity in December, followed by a gradual increase in January. A significant surge occurs in late February, peaking at approximately 1000 cases in early March. This is followed by a period of fluctuation with a general downward trend, ending with a sharp drop in early April.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for Dec, Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low activity until late January, followed by a rapid ascent to a peak of approximately 100,000 cases in early March. After the peak, the number of cases begins to decline, showing significant daily fluctuations.
