The graph displays the daily count of COVID-19 cases in the United States. The x-axis is labeled with months: Dec, Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a scale from 0 to 100,000. A red dashed vertical line is positioned at the beginning of the data series in early December. The data shows a significant increase in cases starting in late December, peaking in early March at approximately 95,000 cases. Following this peak, there is a sharp decline in cases, which then stabilizes at a lower level through the end of April.

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 15. The x-axis shows months from November to April. A red dashed vertical line is positioned at the beginning of December, indicating the start of the second wave. The data shows a peak in late December, followed by a sharp decline and a subsequent rise in early March, indicating a second wave.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 7.5, 10.0, 12.5, and 15.0. The x-axis is labeled with months: Dec, Jan, Feb, Mar, and Apr. A vertical dashed red line is positioned at the end of December. The data shows a significant rise in cases starting in late December, reaching a peak of about 15.0 cases in early January. After this peak, the number of cases drops and then fluctuates between approximately 6.5 and 8.0 cases through the end of April.
