The graph displays the monthly evolution of COVID-19 cases in the Île de France region. The y-axis represents the number of cases, with major grid lines at 0, 2,000, 4,000, 6,000, 8,000, and 10,000. The x-axis shows the timeline from Jan 2020 to Nov 2020, with labels for Jan 2020, Apr 2020, Jul 2020, and Oct 2020. The data shows a sharp increase in cases starting in March 2020, peaking in May 2020 at approximately 9,500 cases. Following this peak, there is a period of relative stability with minor fluctuations between 4,000 and 6,000 cases from June to August. A second wave begins in late August, reaching a peak of about 7,000 cases in early September, before declining again towards the end of the period shown.

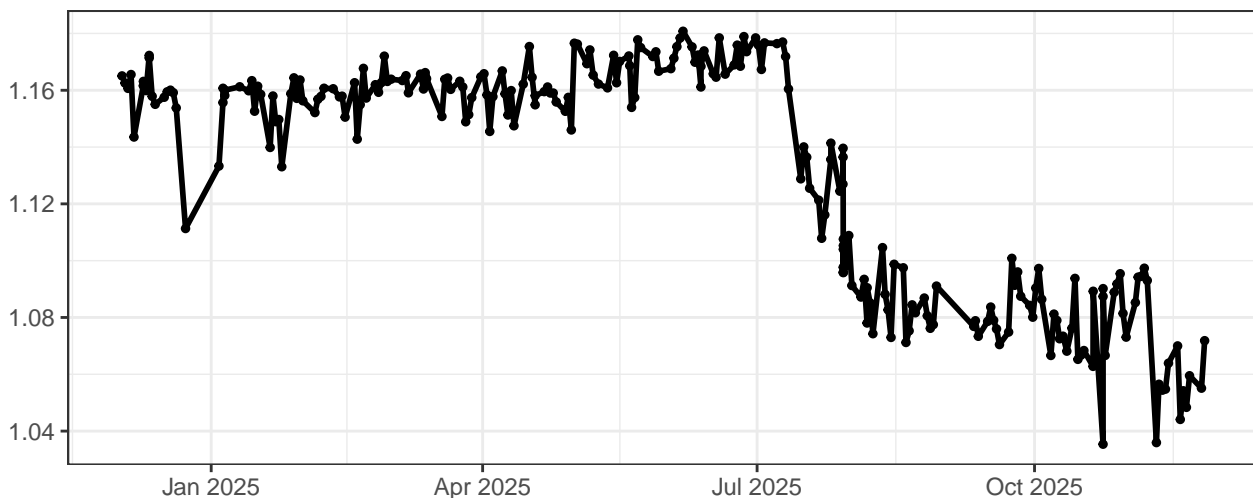

The chart displays the monthly evolution of the 10-year Treasury yield. The x-axis represents time from January 2025 to November 2025, with major ticks every three months. The y-axis represents the yield percentage, ranging from 3.00% to 5.00% in 0.25% increments. The yield starts at approximately 4.25% in January, peaks at 4.75% in May, and then generally declines to around 3.50% by November.

The chart displays the monthly evolution of the Dow Jones Industrial Average from January 2025 to October 2025. The y-axis represents the index value, ranging from 30,000 to 45,000. The x-axis shows the timeline with labels for Jan 2025, Apr 2025, Jul 2025, and Oct 2025. The index starts at approximately 44,000 in January 2025, peaks at 45,000 in February, and then declines to around 40,000 by April. It remains relatively stable until June, when it reaches a peak of 44,000. A sharp drop occurs in late 2025, with the index falling to a low of approximately 30,000 in October. It then recovers to around 35,000 by November and continues to fluctuate between 33,000 and 36,000 through December.
