The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for February, March, and April. The y-axis represents the number of cases, with a grid extending to 100,000. The data shows a significant peak in early February, reaching nearly 100,000 cases, followed by a period of fluctuation and a general downward trend towards the end of the period shown.

The graph displays the daily death toll in the UK during the early stages of the COVID-19 pandemic. The data is characterized by extreme daily fluctuations, with a major peak of nearly 115,000 deaths in early January. Following this peak, there is a period of relative stability around 110,000 deaths, followed by a sharp decline to approximately 105,000 by late January. The death toll then continues to fluctuate, with a notable peak in early March followed by a decline and subsequent fluctuations through April.
