The line graph illustrates the monthly variation of the number of COVID-19 cases in the Republic of Serbia from January 2020 to January 2021. The x-axis represents time, with labels for Jan 2020, Apr 2020, Jul 2020, and Oct 2020. The y-axis represents the number of cases, with a scale from 0 to 100,000. The graph shows a highly volatile trend with several peaks, the highest being in late 2020 and early 2021, reaching nearly 100,000 cases. There are also periods of relative stability and lower case counts, particularly in the early months of 2020 and mid-2020.
