The graph displays the daily count of COVID-19 cases in the United States from December 1st to April 1st. The x-axis represents time in months (Dec, Jan, Feb, Mar, Apr), and the y-axis represents the number of cases, ranging from 0 to 100,000. The data shows a period of low case counts in December and January, followed by a significant surge starting in late February. The cases peaked at approximately 100,000 in early March and then began to decline, with a notable drop in late March and a slight recovery in early April.

The line graph displays the daily number of COVID-19 cases in the United States from December to April. The x-axis represents time, with labels for Dec, Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a major grid line at 200,000. The data shows a period of relative stability around 100,000 cases in December and January, followed by a sharp increase starting in late February. A major peak occurs in early March, reaching over 200,000 cases. This is followed by a decline and a small resurgence in late March, before a final drop in early April.

Date	Number of Cases (approximate)
Dec 1	100,000
Dec 15	100,000
Dec 25	100,000
Jan 5	100,000
Jan 15	100,000
Jan 25	100,000
Feb 5	100,000
Feb 15	100,000
Feb 25	100,000
Mar 5	100,000
Mar 10	200,000
Mar 15	100,000
Mar 20	100,000
Mar 25	100,000
Mar 30	100,000
Apr 5	100,000
