The plot displays the daily count of COVID-19 cases in the United States. The data shows a period of low activity (around 10,000 cases) from November through late February. Starting in early March, there is a rapid and significant increase in cases, with the count rising sharply to over 100,000 by the beginning of April. The plot uses blue dots for daily data points and a blue line to connect them, highlighting the exponential growth phase of the pandemic.
