The graph displays the daily number of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis represents time, with labels for February, March, and April. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low case counts in January, followed by a significant increase starting in late February. The number of cases peaks in early April at approximately 100,000, and then begins to decline.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for February, March, and April. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low case counts (mostly below 10,000) from January through mid-February. Starting in late February, there is a significant upward trend, with cases rising sharply to a peak of approximately 100,000 in early March. Following the peak, the number of cases begins to decline, showing a steady decrease through April, with some minor fluctuations, including a small secondary peak in mid-April.
