V450-A-% rCV

The graph displays the daily count of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis represents time, with labels for Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a scale from 0 to 100,000 in increments of 20,000. The data shows a period of low case counts (below 20,000) from January through early February. A significant increase begins in late February, reaching a peak of approximately 100,000 cases in early March. Following the peak, the number of cases declines sharply, returning to levels below 20,000 by mid-March and remaining relatively stable through April.

Date	Number of Cases (Approximate)
Jan 1	10,000
Jan 15	10,000
Jan 20	15,000
Jan 25	10,000
Jan 30	12,000
Feb 5	15,000
Feb 10	10,000
Feb 15	12,000
Feb 20	15,000
Feb 25	10,000
Feb 30	12,000
Mar 5	15,000
Mar 10	10,000
Mar 15	12,000
Mar 20	15,000
Mar 25	10,000
Mar 30	12,000
Apr 1	10,000

The graph displays the daily count of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis represents time in months (Jan, Feb, Mar, Apr), and the y-axis represents the number of cases, ranging from 0 to 100,000. The data shows a period of low case counts in January, followed by a significant surge starting in late February. The cases peaked at approximately 100,000 in early March and then began to decline, with a notable dip in late March followed by a slight recovery and another dip in early April.

Date	Number of Cases (Approximate)
Jan 1	10,000
Jan 15	15,000
Jan 30	20,000
Feb 1	15,000
Feb 15	30,000
Feb 25	40,000
Mar 1	100,000
Mar 15	20,000
Mar 30	15,000
Apr 1	10,000

The graph displays the daily count of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis represents time, with labels for Jan, Feb, Mar, and Apr. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low case counts (mostly below 10,000) from January through early February. A significant increase begins in late February, reaching a peak of approximately 100,000 cases in early March. Following the peak, the number of cases declines sharply, falling below 10,000 by mid-March and continuing to decrease through April.
