The graph displays the daily count of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis is marked with the months of January, February, March, and April. The y-axis represents the number of cases, with a grid extending up to 100. The data points, represented by black dots connected by a line, show a consistent upward trend. The number of cases starts near zero in January, increases steadily through February and March, and then shows a sharp increase in early April, reaching approximately 100 cases by the end of the period shown.

Month	Observed - Expected
Jan	0.000
Feb	0.000
Mar	0.000
Apr	0.000

Days since start of outbreak	Number of cases
10	28.73
20	28.73
40	28.73
60	28.73
