The graph displays the percentage of relative coefficient of variation (%rCV) over time. The x-axis represents time from January 2025 to October 2025, with major ticks every three months. The y-axis represents %rCV, ranging from 0 to 9. A green line with circular markers shows the daily %rCV, which fluctuates significantly. Red squares highlight specific data points, likely representing maximum values or points of interest. A vertical dashed red line is positioned at approximately January 2025.

The graph displays the percentage of relative coefficient of variation (%rCV) over time. The x-axis represents time from January 2025 to October 2025, with major ticks every three months. The y-axis represents %rCV, ranging from 0 to 10.0 in increments of 2.5. A green line with circular markers shows the data, which exhibits significant fluctuations. Red squares highlight specific data points, likely representing maximum values or points of interest. A vertical dashed red line is positioned at approximately January 2025.
