The graph displays the percentage of reads with a read coverage of 1 or more (FSC-A-% rCV) over time. The y-axis represents the percentage, ranging from 4 to 8. The x-axis shows the months from January to April. The data is highly variable, with several peaks and troughs. The highest peak is around 9.5% in late March, and the lowest point is around 3.8% in late March.

The graph displays the percentage of high-resolution FSC data (rCV) over time. The y-axis represents the percentage, ranging from 1.4 to 2.4. The x-axis shows the months from January to April. The data points are connected by a black line, showing a highly variable trend. There is a significant dip in the data around late March, reaching a minimum of approximately 1.42, followed by a sharp increase to about 2.2 in early April.
