The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled 'Date' and shows the months of January, February, March, and April. The data points are connected by a line, showing a sharp rise in cases starting in late February, peaking in early March at approximately 1,000,000 cases, followed by a rapid decline and then a gradual increase again in April.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for February and March. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data points show a steady increase in cases starting in late February, reaching a peak of approximately 100,000 cases in early March. Following the peak, the number of cases begins to decline, showing a significant drop in mid-March, and then continues to decrease through April, with a slight uptick in late April.

The graph displays the daily number of COVID-19 cases in the United States from January 1, 2020, to April 1, 2020. The x-axis represents time, with labels for February and March. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low case counts (mostly below 10,000) from January through early February. Starting in late February, there is a significant upward trend, with cases rising sharply to a peak of approximately 100,000 in early March. Following this peak, the number of cases declines sharply, returning to levels below 10,000 by mid-March, and remains relatively stable with minor fluctuations through April.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for February, March, and April. The y-axis represents the number of cases, with a scale from 0 to 200,000. A prominent peak is visible in early March, where the number of cases exceeds 200,000. Following this peak, the case count drops significantly and then shows a gradual upward trend through the end of the observed period.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 0, 5, 10, 15, and 20. The x-axis is labeled with the months Jan, Feb, Mar, and Apr. A prominent spike occurs in early March, where the number of cases exceeds 20. Following this peak, the case count drops and then shows a slight upward trend in April.
