B530-A-% rCV

The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000 in increments of 2,000. The x-axis is labeled 'Date' and shows months from Sep to Apr. A vertical dashed red line is positioned at approximately November 1st, indicating the start of the lockdown. The data shows a very high initial peak in late September (around 10,000 cases), followed by a sharp decline. After the lockdown, the number of cases remains very low, with a small secondary peak in late March (around 2,000 cases).
