The graph displays the 'Index' on the y-axis against time on the x-axis. The x-axis is labeled with 'Oct 2025', 'Jan 2026', 'Apr 2026', and 'Jul 2026'. The y-axis has a scale from 0 to 100. The index begins at approximately 100 in October 2025, remains relatively stable with minor fluctuations until January 2026, then shows a significant drop to around 20. It remains low until April 2026, followed by a sharp recovery to nearly 100. The index then fluctuates between 80 and 100 until July 2026, where it drops again to around 20 and remains low.

The graph displays the monthly evolution of COVID-19 cases in the Île de France region. The y-axis represents the number of cases, with major grid lines at 0, 20,000, 40,000, 60,000, 80,000, and 100,000. The x-axis shows the timeline from October 2025 to July 2026, with labels for Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The data shows a highly volatile trend with a major peak in early 2026 reaching nearly 100,000 cases, followed by a sharp decline and a subsequent rise in mid-2026.
