The graph displays the percentage of relative coefficient of variation (%rCV) over a period from October to April. The y-axis is labeled '%rCV' and ranges from 0 to 30. The x-axis shows months: Oct, Jan, and Apr. The data is represented by a magenta line with circular markers at each data point. The values start around 8% in October, remain relatively stable until January, then show a significant increase, peaking at approximately 35% in late January. Following this peak, the values fluctuate between 10% and 15% through April.
