The graph displays the daily number of COVID-19 cases in the United States over a 10-month period. The x-axis represents time, with labels for Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The y-axis represents the number of cases, with a grid extending from 0 to 100,000. The data is plotted as a green line with circular markers at each data point. The number of cases starts at approximately 20,000 in late 2025, rises to a peak of nearly 100,000 in early 2026, and then shows a sharp decline to around 20,000 by late 2026.

The graph displays the daily number of COVID-19 cases in the United States. The x-axis represents time, with labels for Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of relative stability around 50,000 cases, followed by a sharp increase to nearly 100,000 cases in early 2026, and then a rapid decline back to around 50,000 cases by mid-2026.
