The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 20. The x-axis shows months from September to April. A vertical dashed red line is positioned at the beginning of March, indicating the start of the lockdown. The data shows a period of relative stability with minor fluctuations until late February, followed by a sharp increase in cases, peaking at over 20 cases in early March. After the lockdown, there is a rapid decline in cases, followed by a period of low activity and a slight uptick in April.
