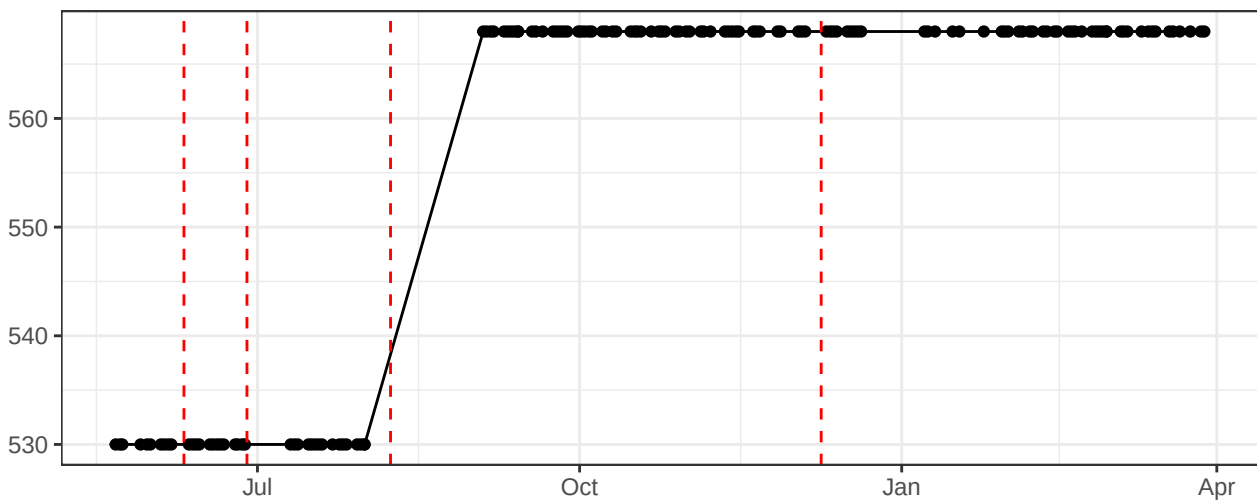

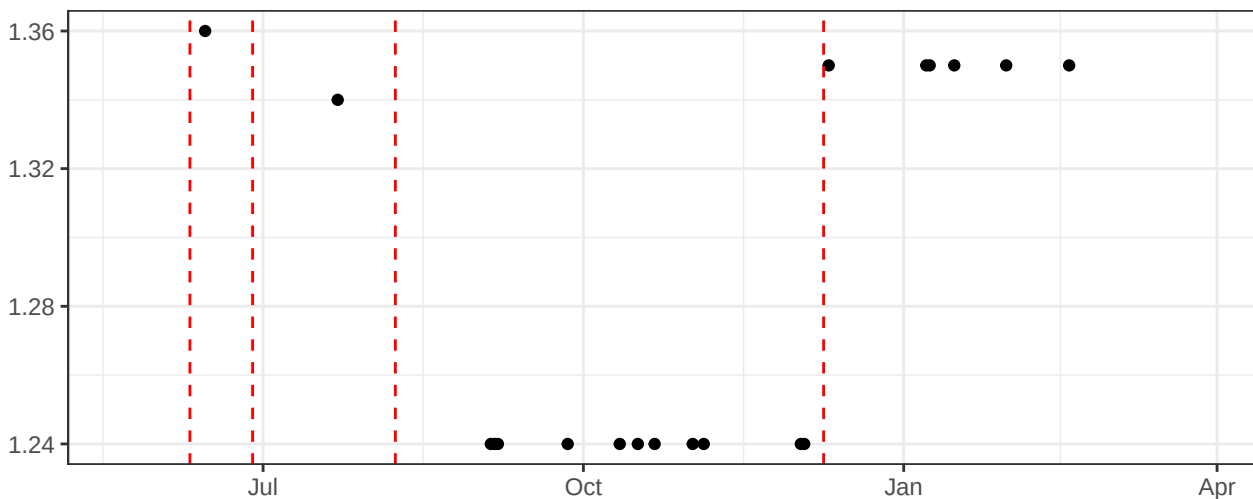

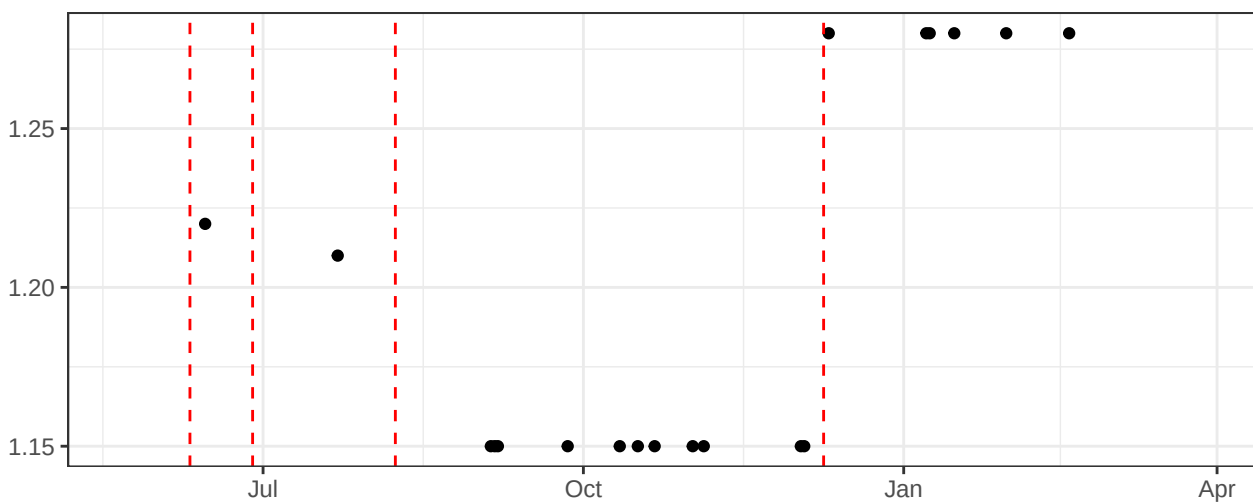

Figure 1 is a scatter plot showing the time series of the difference between the estimated and true values of the parameter α . The y-axis ranges from -0.050 to 0.050. The x-axis shows months from July to April. Data points are black dots clustered around zero. Vertical dashed red lines indicate specific time points.

Scatter plot showing monthly mean precipitation (mm) for the period 1979-2019. The y-axis represents precipitation in mm, ranging from 29 to 32. The x-axis represents months, with labels for Jul, Oct, Jan, and Apr. Vertical dashed red lines indicate the start and end of the study period. The plot shows a general trend of increasing precipitation over time, with a notable increase starting around 2000.
