The graph displays the daily number of COVID-19 cases in the Netherlands from October to April. The y-axis represents the number of cases, ranging from 0 to 15. The x-axis represents time, with labels for October, January, and April. A red dashed vertical line is positioned at the end of November, indicating the start of the second wave. The first wave peaks in late November at approximately 12 cases. Following a decline, a second, much larger wave begins in late January, peaking in late March at 15 cases. The data shows significant fluctuations throughout the period.

Date	Number of Cases
Oct 1	3.5
Oct 5	3.0
Oct 10	3.5
Oct 15	4.5
Oct 20	4.5

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 7.5, 10.0, 12.5, and 15.0. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at approximately November 15th. The data shows a steady climb from October, reaching a peak of about 14.5 cases in late November, followed by a precipitous drop to around 7 cases by early December, and then a period of fluctuation between 6 and 8 cases through April.
