The graph displays the daily number of COVID-19 cases in the United States. The y-axis is labeled 'Number of cases' and ranges from 0 to 100,000 in increments of 20,000. The x-axis is labeled 'Date' and shows months from Oct to Apr. A vertical red dashed line is positioned at the beginning of November 2020, indicating the start of the vaccination campaign. The data shows a period of relative stability with minor fluctuations until late March/early April 2021, where there is a sharp, significant increase in cases, peaking at approximately 95,000.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 0, 10, 15, and 20. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at the end of December. The data shows a period of fluctuating case counts from October through December, followed by a sharp spike in early January that exceeds the 20-case mark. After this peak, the case counts drop significantly and remain relatively low through April.
