The graph displays the daily number of COVID-19 cases in the Netherlands. The y-axis is labeled 'Number of cases' and ranges from 0 to 20. The x-axis shows months from September to April. A red dashed vertical line is positioned at the end of December, separating the first wave from the second. The first wave peaks at approximately 14 cases in late November. The second wave begins in January, peaks at over 20 cases in early March, and then declines towards April.
