The graph displays the monthly evolution of the number of COVID-19 cases in the Île de France region from September 2025 to August 2026. The y-axis represents the number of cases, ranging from 0 to 10,000. The x-axis shows the time period, with major ticks for October 2025, January 2026, April 2026, and July 2026. The data is represented by a blue line with black dots at each data point. The graph shows a highly volatile trend with a significant peak in late 2025, a sharp decline in early 2026, and a subsequent rise through mid-2026.
