The graph displays the daily count of COVID-19 cases in the United States. The y-axis is on a logarithmic scale, with labels at 100,000 and 1,000,000. The x-axis spans from October 2019 to April 2020. A red dashed vertical line is positioned at the beginning of the data series in early 2020. The data shows a period of low case counts until late March, followed by a massive spike in early April, peaking at over 1,000,000 cases.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled with values 0, 10, 15, and 20. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at approximately November 20th. The data shows a first wave peaking in late November, followed by a decline and then a second wave starting in late January, peaking in early February with a value exceeding 20 cases, before declining again.
