B530-A-% rCV

The graph displays the percentage of replicates with a coefficient of variation greater than 10 (%rCV) over a period from October to April. The y-axis is labeled '%rCV' and ranges from 5 to 20. The x-axis shows months: Oct, Jan, and Apr. A vertical dashed red line is positioned at approximately November 15. Before this line, the %rCV values are generally high, fluctuating between 11 and 21. After the line, the values drop significantly, mostly staying below 7, with a single sharp spike to 20 in late March.
