The graph displays the daily number of COVID-19 cases in the United States from October to April. The y-axis represents the number of cases, with a dashed red line at 100,000. The x-axis shows months from Oct to Apr. The data shows a period of relative stability with minor fluctuations until late March, followed by a sharp, vertical spike in early April that exceeds the 100,000 case threshold.

The graph displays the daily number of COVID-19 cases in the United States. The y-axis is labeled with values 0, 10, 15, and 20. The x-axis is labeled with months: Oct, Jan, and Apr. A red dashed vertical line is positioned at the beginning of December 2020. The data shows a period of fluctuating case counts between October and November, followed by a sharp increase in December, peaking at over 20 cases in early January. After this peak, the number of cases drops significantly and remains relatively low through April.
