The graph displays the daily count of COVID-19 cases in the United States over a period from October 2025 to August 2026. The y-axis represents the number of cases, with a scale that includes a major tick at 100,000 and a secondary tick at 200,000. The x-axis marks time in three-month intervals: Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The data shows a significant peak in early October 2025, followed by a period of relative stability with minor fluctuations. A second, much larger peak occurs in late August 2026, where the case count reaches its maximum value, exceeding 200,000. The graph is plotted with a red line and circular markers, and a light gray grid is visible in the background.

The graph displays the daily number of COVID-19 cases in the United States. The y-axis, 'Number of cases', ranges from 0 to 100,000. The x-axis, 'Date', spans from October 2025 to August 2026. The data shows a significant peak in cases around early 2026, reaching nearly 100,000 cases, followed by a sharp decline and a subsequent rise in late 2026.

The graph displays the daily number of COVID-19 cases in the United States. The x-axis represents time, with labels for Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a significant peak in cases around January 2026, reaching over 100,000 cases. Following this peak, the number of cases declines and remains relatively low until late 2026, where it shows a smaller spike.
