The scatter plot displays daily COVID-19 deaths in the US. The y-axis is labeled 'Deaths' and ranges from 0 to 1000. The x-axis shows months from July to April. Data points are black dots. Two vertical red dashed lines indicate the dates of the first and second waves of the pandemic.

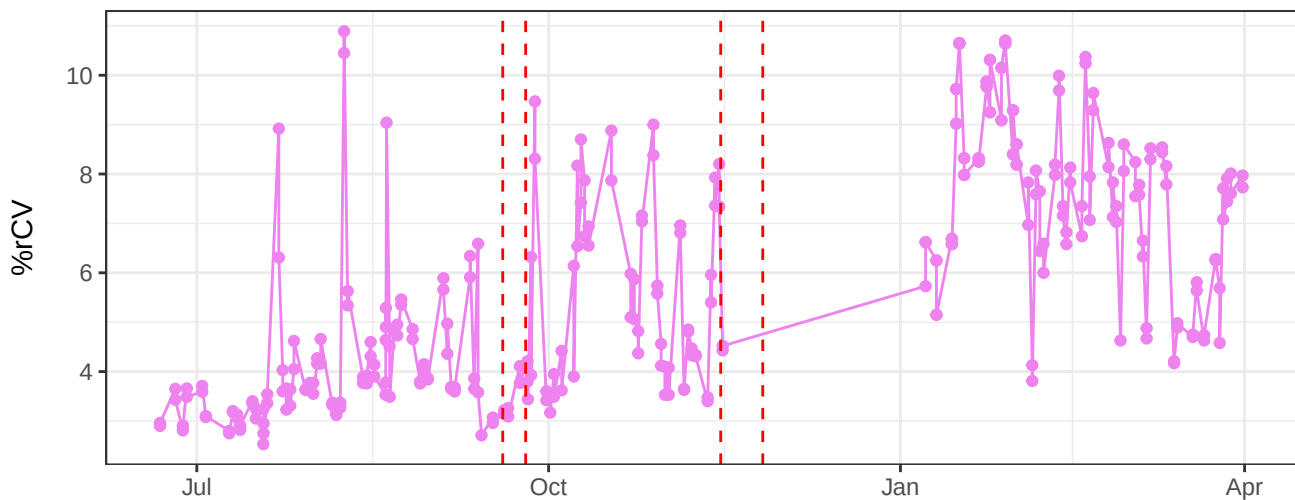

Date (Approximate)	Deaths (Approximate)
July 15, 2020	900
July 20, 2020	950
July 25, 2020	950
August 15, 2020	900
August 25, 2020	950
September 15, 2020	0
October 15, 2020	0
November 15, 2020	0
December 15, 2020	0
January 15, 2021	0
February 15, 2021	0
March 15, 2021	0
April 15, 2021	0

The scatter plot displays daily death tolls in the United States. The y-axis is labeled 'Deaths' and ranges from 0 to 100,000 in increments of 20,000. The x-axis shows months from July to April. Two vertical red dashed lines mark the start of the first and second waves. The first wave shows a sharp increase in deaths starting in late July, peaking at approximately 90,000 deaths per day in early August, and then declining. The second wave shows a similar pattern, starting in late October, peaking at approximately 90,000 deaths per day in early November, and then declining. There are also a few isolated data points in December and January, showing a slight increase in deaths.
