UV_LaserDelay

Violet_LaserDelay

Blue_LaserDelay

The graph illustrates the number of cases over time. The x-axis is labeled with months: Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The y-axis represents the number of cases, with a grid line at 1000. The black series starts around 500, peaks near 1000 in late 2025, drops sharply to around 200 in early 2026, and then rises to a peak of nearly 1500 in early 2026 before declining. The grey series follows a similar pattern but with more frequent fluctuations, peaking around 1200 in early 2026 and then declining to around 500 by mid-2026.

The plot displays the number of active cases over time. The y-axis is labeled with values 500000, 1000000, 1500000, and 2000000. The x-axis has labels for Oct 2025, Jan 2026, Apr 2026, and Jul 2026. The data shows significant fluctuations in the early period, with several sharp drops in active cases, followed by a period of relative stability around 2,000,000 cases from mid-2025 onwards.
